

EBS

This screenshot shows the AWS Elastic Beanstalk console's 'Applications' page. The left sidebar contains the 'Elastic Beanstalk' menu with options for 'Applications', 'Environments', and 'Change history'. Below this, 'Recent environments' lists 'My-first-eb-application-env' and 'My-first-eb-application-env-1'. The main content area, titled 'Applications (2)', features a table with columns for 'Application name', 'Environments', 'Date created', 'Last modified', and 'ARN'. Two applications are listed: 'my-first-application' and 'my-first-eb-application'. The latter is selected and shows its associated environment 'My-first-eb-application-env-1'. Above the table, there are buttons for 'Actions' and 'Create application'. At the top of the console, several status messages indicate that the environment is being launched or has been successfully launched.

Application name	Environments	Date created	Last modified	ARN
my-first-application	-	December 18, 2023 23:41:38 (UTC-7)	December 18, 2023 23:41:38 (UTC-7)	arn:aws:elasticbeanstalk:us-east-1:123456789012:application/my-first-application
my-first-eb-application	My-first-eb-application-env My-first-eb-application-env-1	December 19, 2023 22:49:59 (UTC-7)	December 19, 2023 22:49:59 (UTC-7)	arn:aws:elasticbeanstalk:us-east-1:123456789012:application/my-first-eb-application

This screenshot displays the 'My-first-eb-application-env' dashboard in the AWS Elastic Beanstalk console. The left sidebar shows the 'Environments' section expanded, with a list of actions including 'Go to environment', 'Configuration', 'Events', 'Health', 'Logs', 'Monitoring', 'Alarms', 'Managed updates', and 'Tags'. The main content area is titled 'My-first-eb-application-env' and includes an 'Environment overview' section with a 'Warning' icon and a 'View causes' link. It also shows the 'Environment ID' (e-wkrjnvymz), 'Domain' (My-first-eb-application-env.eba-ebxxcegh.us-east-1.elasticbeanstalk.com), and 'Application name' (my-first-eb-application). To the right, the 'Platform' section indicates 'PHP 8.2 running on 64bit Amazon Linux 2023/4.0.4' and shows the 'Platform state' as 'Supported'. At the bottom, there are tabs for 'Events', 'Health', 'Logs', 'Monitoring', 'Alarms', 'Managed updates', and 'Tags'. The 'Events' tab is active, showing a list of events.

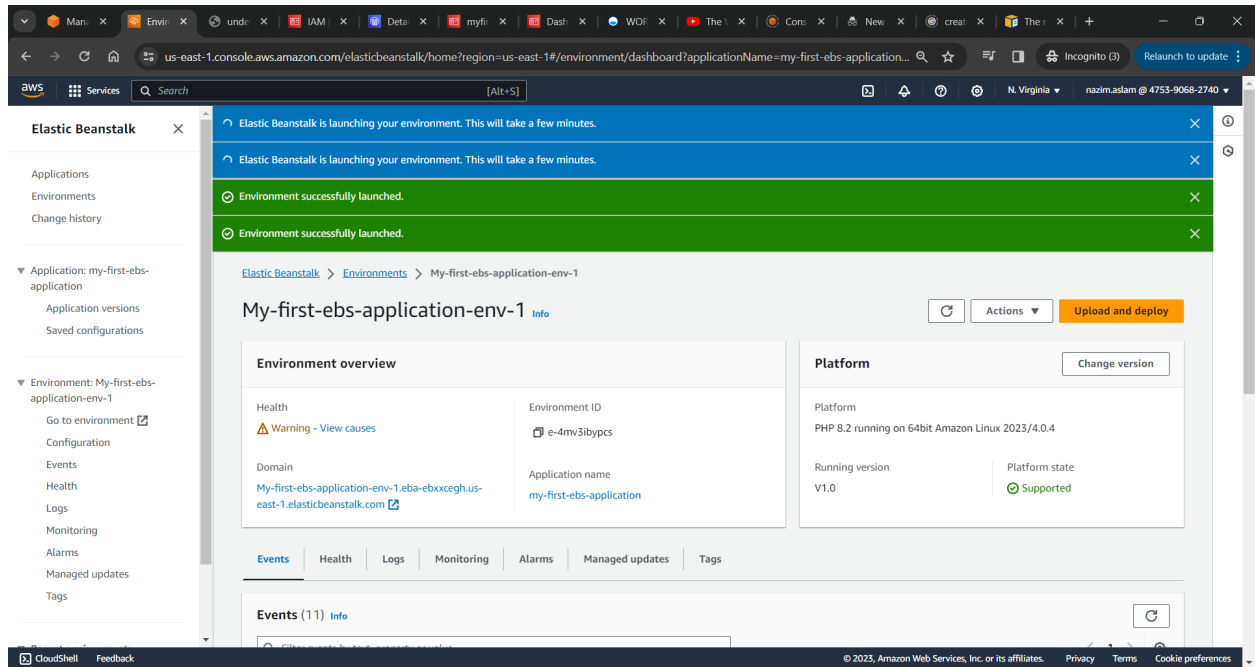

Environment overview

- Health: ⚠ Warning - [View causes](#)
- Environment ID: e-wkrjnvymz
- Domain: [My-first-eb-application-env.eba-ebxxcegh.us-east-1.elasticbeanstalk.com](#)
- Application name: my-first-eb-application

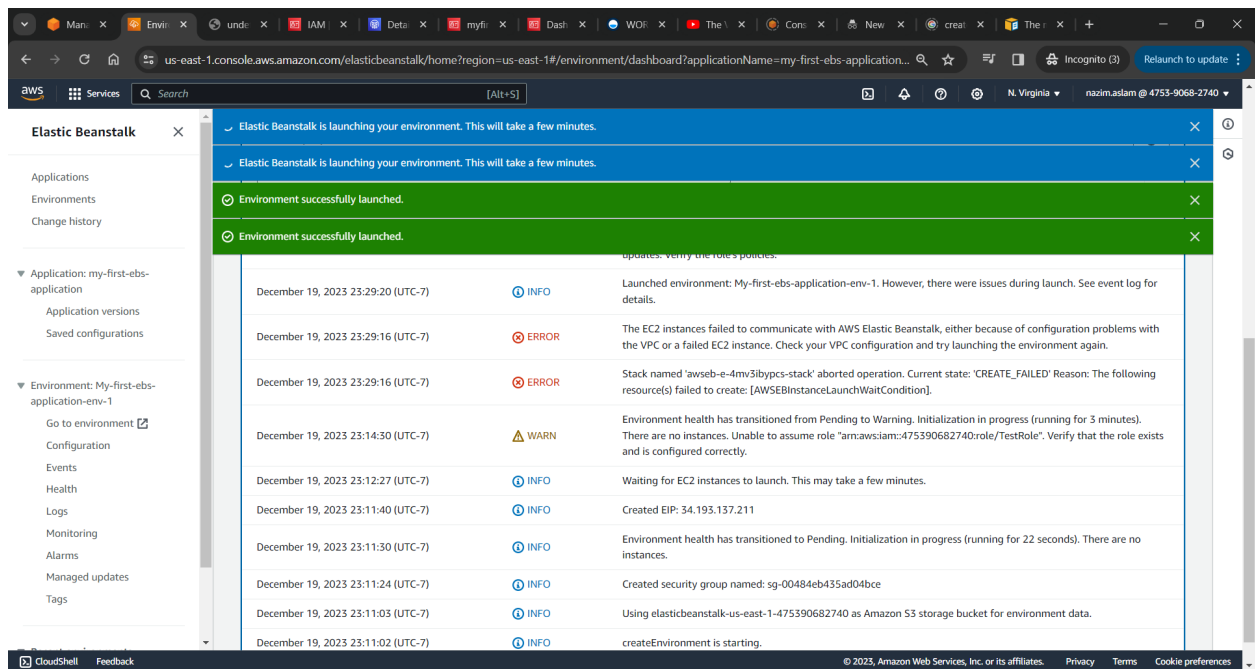

Platform

- Platform: PHP 8.2 running on 64bit Amazon Linux 2023/4.0.4
- Running version: -
- Platform state: ✔ Supported
